IML GUIDE ON HOW TO ASSEMBLE MANNEQUIN

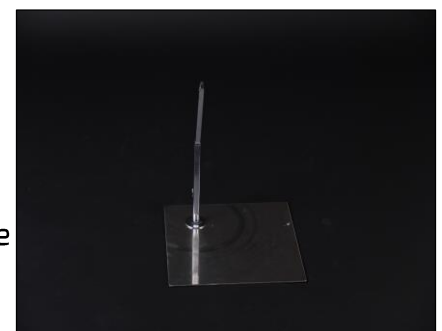

1. Set Up Stand:

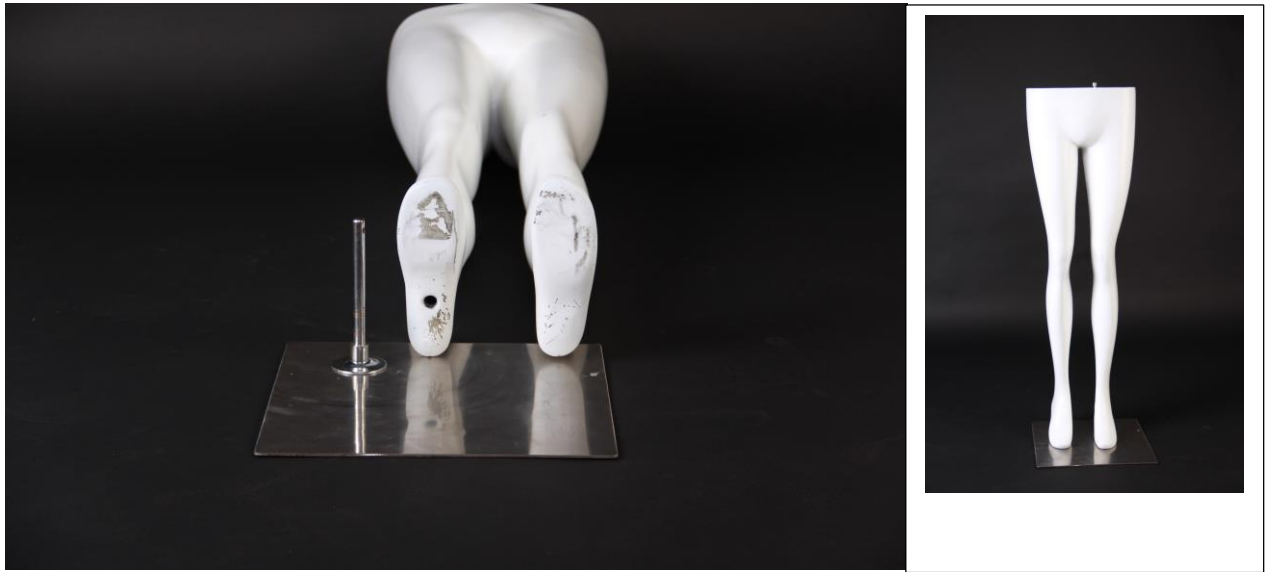

(a) Stand with Foot Pin Only: Use this set up only when you want to support the mannequin only through the foot.

(b) Stand with Calf Rod: slide it onto the foot pin and tighten the thumb screw. Use this setup if you want to support the mannequin from the calf so it can wear shoes.

2. Support the mannequin legs and slide onto the foot pin or the calf rod (NOTE: If the mannequin is brand new, it may still be a bit tight and require a bit of a wiggle).

3. Screw in the support plastic cone supplied, gently into the threaded hole (as shown below).

4. Slide and fit in the torso onto the hips. Rotate until it aligns perfectly.

5. Clip in and attach the hands onto the arms until it aligns without gaps at wrists, then attach the assembled hand onto the torso by sliding onto the hole on the side.

6. You are now all done and mannequin is ready to be used.
